DENIS **AZAMATOV**

<SOFTWARE ENGINEER>

EXPERIENCE

LogiSense LLC, Nov 2021 to Present

Team Lead Developer at Product Management System for entertaining events industry.

- · Developed a unique cross-platform software for cash registers. This project covers web development and cross-platform desktop development. Includes integration hardware such as printer, scanner and PIN pad.
- Replaced a team of 4 people and optimized B2C site support.
- An entrance ticket verification system has been developed that can handle the largest events.
- Developed new features in the React Native mobile application for political elections.

IT Academy, Jan 2022 to Sep 2022

.NET Course Mentor

· Taught students from scratch to Junior Full Stack Developer level. My students now work in banks, startups and big tech companies.

FinanceSoft, May 2021 to Nov 2021

Full Stack Developer

- · Developed a successful online lending system.
- Designed and developed a remote identification based on face and document system recognition.
- · Made a lot of integrations with government services.
